# TURTLE 2

## INFLATION TIME

Very fast under 100 ms to inflate a large volume with an optimal pressure. Faster than the blink of an eye.

## INNOVATIVE AIRBAG SHAPE

Stabilization of the head, neck and spine to avoid whiplash injuries and hyper-extension.

## AIRBAG VOLUME

From 14 to 28 liters of protection (depends on the airbag size).

## REUSABLE

Replace the CO2 cartridge to reactivate your airbag on your own in less than 2 min.

## FEATURES

 <b>Excellent protection with our TURTLE technology</b>	A high-quality back protector (SAS-TEC level 2) is placed over the airbag as a rigid outer material like a turtle shell so that the whole back is protected in case of a fall. This innovation is a very big protection improvement for the back. The results of absorption and distribution of shocks is considerably higher and it protects from intruding objects.
<b>Adjustable</b>	Three adjustment straps to fit the vest nicely over any motorcycle gear. Resistant fastening clips to sustain many inflations. Easy to open and close even with gloves.
<b>Retro-reflective</b>	We added small retro-reflective parts for night visibility at the back to provide a discrete and strong protection.
<b>Ventilated textile and high comfort</b>	Interior textile 3D mesh for maximum air circulation. We have a very low cut underarm to keep a full freedom of movement. On this new version, we chose a soft neoprene collar for a better comfort around the neck.
<b>Convenient</b>	1 exterior pocket for small objects (bank card, cash, highway badge, etc.).
<b>Reconditioning</b>	Quick and easy replacement of the CO2 cartridge. It is nicely hidden in a pocket for more aesthetics.
<b>Mechanical trigger system</b>	Helite airbags are mechanical to avoid unexpected airbag activation and changing batteries. No special tools or technical knowledge are required to install the lanyard on the motorcycle.
<b>Certification</b> 	CE certification - Turtle 2 is certified by the external laboratory ALIENOR CERTIFICATION, the French specialist for objectively testing Personal Protective Equipment (PPE).

The **Turtle 2 in black** is known for its **discrete** look. It matches to any outfit and makes the extra protection as unobtrusive as possible. **Retro-reflective stripes** on the back guarantee the rider a **high visibility** on the road at night or in bad weather conditions. The CO2 cartridge is nicely hidden in a pocket. Due to **generous adjustment** straps the Turtle 2 fits easily over any motorcycle jacket while ensuring a **high comfort**.

♀♂ For women and men

**6200,- NOK**

Sizes XS -> XXL

Black color is always on stock. The other colors are available on request, up to 10 weeks delivery time. The price for a customized Turtle is **6300,- NOK**. Minimum order is 10 pcs

## FAQ

1

### Can I wash the Turtle 2 ?

Our Turtle 2 in Black must not be washed in a washing machine or put in dryer. The airbag vest can be washed by hand without drowning the mechanical part of the system. We recommend that you energetically scrub with a brush in warm soapy water (no detergent, products may alter the fabric). Baby wipes are very effective. Do not rub hard on the retroreflective gray parts.

2

### Is the Turtle 2 water resistant?

As long as the vest is not submerged in water, it is water resistant. It was designed for outdoor use. So you can also wear it when it is raining.

3

### When sliding after a crash, will my airbag vest be damaged?

The vest is made of very resistant and anti-abrasion material so that the textile will protect the airbag tubes. Additionally, the TURTLE vest has a back protector on top of the airbag, which also protects the airbag especially from intruding objects. We have hundreds of happy customers that reuse their airbag after they have fallen and slid, whether on the road or on the track. If the airbag does get damaged it will probably have saved you from fractures and/or bruises. Helite is at your service in case your airbag needs a repair or check.

4

### Is the airbag reusable?

Yes, as long as the airbag is in good condition (no holes, tears) you can reuse it. Easy to do, you can reset the system yourself in 2 minutes, without sending your vest back to Helite. It is only necessary to replace the CO2 cartridge with a new one, available at all Helite dealers worldwide. Please, check the size of the airbag when replacing cartridges. Please make sure to choose the right cartridge size that corresponds to the size of your airbag.

5

### Can the airbag activate itself automatically? What if I forget to detach myself?

Helite airbags are mechanical to avoid unexpected airbag activation. Accidental deployments are extremely rare. The tractive force required to activate the airbag is between 20 and 30 kg depending on the size. If a rider forgets to detach from his bike, he will feel a strong tension on his vest or jacket before the airbag is triggered. As the car belt, clip and unclip the motorcycle strap will quickly become a habit.
