TURTLE 2

INFLATION TIME

Very fast under 100 ms to inflate a large volume with an optimal pressure. Faster than the blink of an eye.

INNOVATIVE AIRBAG SHAPE

Stabilization of the head, neck and spine to avoid whiplash injuries and hyper-extension.

AIRBAG VOLUME

From 14 to 28 liters of protection (depends on the airbag size).

REUSABLE

Replace the CO2 cartridge to reactivate your airbag on your own in less than 2 min.

FEATURES

 Excellent protection with our TURTLE technology	A high-quality back protector (SAS-TEC level 2) is placed over the airbag as a rigid outer material like a turtle shell so that the whole back is protected in case of a fall. This innovation is a very big protection improvement for the back. The results of absorption and distribution of shocks is considerably higher and it protects from intruding objects.
Adjustable	Three adjustment straps to fit the vest nicely over any motorcycle gear. Resistant fastening clips to sustain many inflations. Easy to open and close even with gloves.
High visibility	The Hi-Vis color in combination with retro-reflective stripes makes the rider as visible as possible on the road at night or in bad weather conditions.
Ventilated textile and high comfort	Interior textile 3D mesh for maximum air circulation. We have a very low cut underarm to keep a full freedom of movement. On this new version, we chose a soft neoprene collar for a better comfort around the neck.
Convenient	1 exterior pocket for small objects (bank card, cash, highway badge, etc.).
Reconditioning	Quick and easy replacement of the CO2 cartridge. It is nicely hidden in a pocket for more aesthetics.
Mechanical trigger system	Helite airbags are mechanical to avoid unexpected airbag activation and changing batteries. No special tools or technical knowledge are required to install the lanyard on the motorcycle.
Certification 	CE certification - Turtle 2 is certified by the external laboratory ALIENOR CERTIFICATION, the French specialist for objectively testing Personal Protective Equipment (PPE).

The TURTLE 2 in hi-vis merges optimal protection and a highly visible design. This color in combination with retro-reflective stripes makes the rider as visible as possible on the road. Accident prevention, that's where the focus is on. The CO2 cartridge is nicely hidden in a (velcro) pocket. Thanks to generous adjustment straps the Turtle nicely fits over any motorcycle jacket and guarantees a high comfort.

FAQ

1

Can I wash the Turtle 2 ?

Our Turtle 2 in Hi-Vis must not be washed in a washing machine or put in dryer. The airbag vest can be washed by hand without drowning the mechanical part of the system. We recommend that you energetically scrub with a brush in warm soapy water (no detergent, products may alter the fabric). Baby wipes are very effective. Do not rub hard on the retroreflective gray parts.

2

Is the Turtle 2 water resistant?

As long as the vest is not submerged in water, it is water resistant. It was designed for outdoor use. So you can also wear it when it is raining.

3

Can I wear a backpack over a Helite airbag system?

Yes, while keeping in mind that the more resistance there is, the slower the airbag will deploy properly. We recommend to adjust your backpack straps fairly wide.

4

Is the airbag reusable?

Yes, as long as the airbag is in good condition (no holes, tears) you can reuse it. Easy to do, you can reset the system yourself in 2 minutes, without sending your vest back to Helite. It is only necessary to replace the CO2 cartridge with a new one, available at all Helite dealers worldwide. Please, check the size of the airbag when replacing cartridges. Please make sure to choose the right cartridge size that corresponds to the size of your airbag.

5

Can the airbag activate itself automatically? What if I forget to detach myself?

Helite airbags are mechanical to avoid unexpected airbag activation. Accidental deployments are extremely rare. The tractive force required to activate the airbag is between 20 and 30 kg depending on the size. If a rider forgets to detach from his bike, he will feel a strong tension on his vest or jacket before the airbag is triggered. As the car belt, clip and unclip the motorcycle strap will quickly become a habit.
